## ABOUT THE SEARCH

The Search is an additional way to access the information on the covers and in the cover stories. The key words and phrases indicate that the chosen topic or topics are discussed in the cover story. They are not necessarily attributes of the persons pictured on the cover.

To get you started, there are 18 search categories with pop-up menus of searchable items. Either make up a combination of up to three of these items or add some of your own. Add your own items by clicking on a blank field and typing your request. Try, for example, entering female, blonde hair, and Emmy award in the three white fields. When you have a combination you want to search on, click Do Search.

In addition to the items in the pop-up menus, try typing in names, places, schools, titles of movies, TV shows, books, and songs as well as well-known characters (e.g., J.R. Ewing).

## Search Tips:

- When typing in keywords, don't use punctuation
- The search is an "and" search. This means that if you search on "father" and "baseball," it will retrieve all the covers and cover stories that discuss both fathers *and* baseball, not all the covers that discuss either father *or* baseball.

The Search feature recognizes well over a thousand keywords and phrases. For a complete list of these items, and for more help with the Search feature, see the "search.txt" file on the CD.
