2. Blue G3 SCSI Update for Palette for Macintosh 4.1.2
3. Color Tune for Macintosh
4. Palette Export for Macintosh
5. Palette for Macintosh Patch

1. RasterPlus Macintosh Edition Patch

File: rpm_206p.hqx

RasterPlus Macintosh Edition patch version 2.0.6p fixes a error-handling bug. Requires 2.0.2 to be installed.

2. Blue G3 SCSI Update for Palette for Macintosh 4.1.2

File: g3_scsi_update.sea.hqx

Used to update Palette for Macintosh 4.1.2 and SIPA 3.x for compatibility with new blue G3 Macs. Contains patches for ProPalette7000, ProPalette 8000, HR 6000 and CI 3000/5000

3. Color Tune for Macintosh

File: ctmac.hqx

This is a full installation of Color Tune version 1.0.

4. Palette Export for Macintosh

File: paletteexport201.hqx

This file is a self-extracting executable. After downloading, double-click and it will automatically extract into an installer. Polaroid Palette Export is a Photoshop compatible plug-in specifically designed to provide optimized output directly to Polaroid Palette film recorders. Palette Export is compatible with Adobe Photoshop for Macintosh, Windows 3.1, Windows 95, and Windows NT v4.0, and utilizes the high-speed SCSI interface to communicate with Polaroid Digital Palette and ProPalette color film recorders.

5. Palette for Macintosh Patch

File: patch412.hqx

This file is self-extracting and provides an upgrade patch for Palette for Macintosh v4.0.2 and v4.0.4 to version 4.1.2 providing Macintosh System 8 compatibility. Instructions are included in the imbedded README FIRST file.

IMPORTANT: You **MUST** re-install Palette for Macintosh v4.0.2 or v4.0.4 before running this patch. This patch works with a fresh (unused) installation only.
