SHOT SELECTION

Sometimes the default shot type is not your best option in a given situation. For example, if you're under some trees, your best shot type would be a punch shot. The following are descriptions of the nine shot types:

- Power Shot** Move the slider to the left to muscle up and launch a powerful shot or use it to get extra power for tweener shots. Using a power shot increases the error if you mis-hit the ball.
- Full** A swing for full distance. Move the ball forward in your golfer's stance for more height with less roll and distance on the shot.
- Chip** A short shot near the green. To hit a low trajectory shot with good roll, move the slider towards Bump-N-Run.
- Pitch** For extra control around the green. Move the slider to increase or decrease distance on your shot.
- High Spin** Loft a high shot with plenty of backspin. Move the slider to add height and spin, which may cause the ball to roll back.
- Punch** A low-flying shot from under the trees, a punch is a useful way to get out of the rough stuff and to keep the ball out of the wind. Move the slider to the right to raise the trajectory of the shot.
- Flop** A soft lob with little roll that is typically executed using a lob wedge. Great for greenside shots over hazards. Move the slider to the adjust distance.
- Putt** Selects the putter for shots on the green or its fringe.
- Sand** When you land in the sand, you can vary your shot from Blast to Pick. Blasts grab more sand, travel less, and are best suited for greenside bunkers. Picks should be used from fairway bunkers where a longer flight is desired.

NOTE: If you're playing with an Amateur golfer, you'll have to unlock different shot types by completing lessons.

PLAYING THE GAME

The only way to shoot scores like the pros is to review and understand everything on the screen before every shot. One lapse in concentration can cost you a match.

CHANGE PROFILE

From the Main menu, click the CHANGE PROFILE button to select the golfer you want to play as or to create your own golfer using EA SPORTS™ Game Face II (see p. 11). You'll need to create an Amateur golfer to play in many of the game modes. You may also create your own Pro golfer who will automatically have every shot type available to him or her, while instantly receiving the necessary attributes to compete with other pros.

SWING TYPES

There are four different ways to swing. Beginners may get the hang of golfing with the 2-Click swing or 3-Click swing.

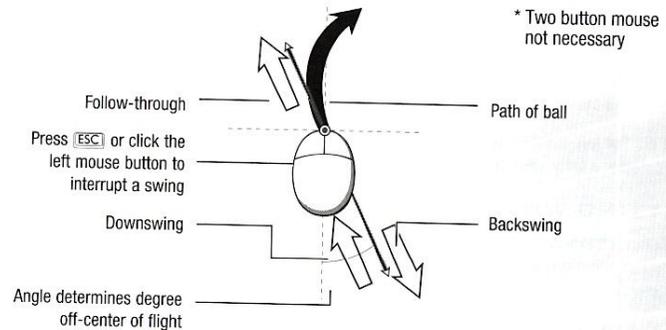

NOTE: When using an optical mouse, use a shorter slower motion to help control your swing.

TRUESWING™

TrueSwing™ delivers the most realistic feeling of swinging a golf club on the computer. There are two types of TrueSwing™ to choose from.

TrueSwing™ (V)ertical Use your mouse to control the on-screen golfer's swing in real-time, perfecting your rhythm and tempo, just like a real golfer.

TrueSwing™ (H)orizontal This is exactly like the TrueSwing™ (V), except you move right to backswing and move left to finish your stroke.

When using TrueSwing™ (V)ertical, think of the mouse as a golf club. The face of the club represents the side of the mouse with the cord. To execute a swing, pull the club face straight back and then push it forward through the point at which you began the swing. The velocity and pace at which you execute the backswing, downswing, and follow-through determine the power on the shot.

TIP: The results of a TrueSwing™ depend on how well your swing matches the type of club that you are using.

TO EXECUTE A SWING:

1. Move the cursor over your golfer. Make sure the swing pointer is displayed on-screen.
2. When you are ready to swing, click the left mouse button.
3. In a smooth motion, draw the mouse straight down to execute the backswing. Pulling the mouse further down increases the backswing and adds power to the stroke.
4. When you have reached the end of the backswing, move the mouse upward until the golf club hits the ball, and it begins flight.

NOTE: If you don't return to the starting position, you might hit off-center, lose power, or even hit the ball off the toe or heel. Movements to the left or right add hook or slice to the ball.

FADES AND DRAWS WITH TRUESWING™

Deviations to the left or right in your mouse movements add spin to the ball, creating draws and fades. In severe cases, deviations can cause hooks and slices.

- ❖ To **add fade** to your shot for a right-handed golfer, pull the mouse back and to the right. When you follow through, finish to the left of the vertical line. This diagonal movement of the mouse forces the ball to fade to the right for a right-handed golfer. To execute a good fade, the mouse must return to the point where you began the swing. Under Club Path, a well-executed fade is listed as OUTSIDE-IN.
- ❖ To **add draw** to your shot for a right-handed golfer, pull the mouse back and to the left. The mouse must return to the point where you began the swing. Under Club Path, a well-executed draw is listed as INSIDE-OUT.
- ❖ To **hook or slice**, increase the angle of the diagonal. A hook is a more extreme draw, and a slice is a more extreme fade.

NOTE: For left-handed golfers, reverse the direction of the diagonal movements. For example, a lefty adds draw by pulling down to the right of the vertical line.

PUTTING WITH TRUESWING™

The distance traveled with the putter depends directly on the amount of backswing and the speed of the club as it impacts the ball. A deviation to the left of the starting mouse point is equivalent to rotating the putter to the left.

 **TIP:** When putting, turn on the green grid (press **G**) to toggle ON/OFF) to show the break of the green in a geometric display.

THE TRUESWING™ ANALYZER

The TrueSwing™ Analyzer shows you important stats about your swing. To toggle display of the TrueSwing™ Analyzer, press **T**.

Speed	Percentage and overall power rating of the shot. Power measures the speed of the club head. Overswings have a power rating greater than 100%.
Impact	How close you got the mouse to the point at which you began your swing. You always want to hit the ball on the sweet spot.
Club Path	Errors in mouse movement off the desired club path.
Tempo	Amount of combined time for your backswing and downswing. Try to execute a smooth swing—deviations result in a poor tempo rating and can result in mis-hits, a reduction in power, or both.

3-CLICK

Longtime computer golfers may prefer this swing type on the course.

To make a complete 3-Click swing:

1. Left-click over the golfer or in the Swing Meter or press **[SPACEBAR]** to begin the backswing. As the Power Arc rises, your swing gains power.
2. To begin the downswing, left-click or press **[SPACEBAR]** again. The Power Arc starts to drop and gain speed.
3. To strike the ball, left-click or press **[SPACEBAR]** a third time. You want to time it so that the Power Arc stops at the Contact Line at the bottom of the Swing Meter.

TIP: When you overswing, the Swing Meter moves faster, which increases your power and the effects of any deviation from the Contact Line.

FADES AND DRAWS

To hit a draw/fade with the 3-Click swing, left-click the mouse before/after it reaches the Contact Line on the downswing. In the TrueSwing™ Analyzer, a well-executed fade shot appears as OUTSIDE-IN under Club Path. A draw appears as INSIDE-OUT.

2-CLICK

For beginners, the 2-Click swing gives a good feel for the rhythm of a golf swing. You click once to begin the Swing Meter and click again to set the power on your shot. The swing automatically finishes with 100% accuracy.

ALL-NEW TIGER PROOFING

For the first time, you can create courses that even Tiger Woods will fear. Cash in Legend Coins (see below) to modify any of the available courses in the game to create the uniquely difficult course you've always wanted. From lengthier Tiger Tees, narrowed fairways, sculpted greens, massive bunkers, deep rough, and much more, the possibilities are endless.

To Tiger Proof a course, simply choose the course you want to modify, then alter any of the courses feature by using the sliders. You can watch the impact of your changes on-screen as you move the sliders. Once you've modified the course to your liking, save it, and it is available for play from then on in the Custom game mode.

LEGEND COINS

This is the currency needed to purchase courses for modification. You earn these tokens by successfully competing in certain game modes.

GAME MODES

From taking on the greatest golfers of all time to just having fun with your friends, each of these game modes give you a chance to keep the game fresh and mix it up on the links.

LEGEND TOUR

The fastest way to solidify your status as a golfing legend is to take on the legends themselves like Jack Nicklaus, Arnold Palmer, Ben Hogan, Seve Ballesteros, and Gary Player. You'll have to earn the right to play against the all-time greats by working your way through a series of challenges against real-life and fantasy golfers on regular, Tiger Proofed (see p. 9), and Compilation Courses.

NOTE: You can unlock courses and golfers in the Legend Tour.

SCENARIOS

Each of the five legends in *Tiger Woods PGA TOUR 2005* are famous for certain attributes. Earn cash and medals by completing a series of scenarios tied to those attributes. For example, Seve Ballesteros is known for his recovery skills, so his scenarios test that aspect of your game.

LESSONS

Work on various aspects of your game. Lessons are available at three skill levels: Introductory, Intermediate, and Advanced. All lessons cost money, so be sure you spend wisely and leave enough for upgraded equipment, upgraded attributes, and tournament entry fees.

TOURNAMENTS

Join a tournament against any level of competition.

TO ENTER A TOURNAMENT:

1. Click the tournament that you want to enter from the Tournament Calendar. Tournament details are displayed at the left of the screen.
2. Click TEE OFF to start the first hole.

GOLFER DEVELOPMENT

If you work at your game and enter tournaments and competitions, you can advance through skill levels and earn money to improve your basic attributes.

DREAM 18

Here's your chance to create the ultimate golf course. With the Legend Coins you earn in various game modes, purchase any of the listed courses, and then customize them using Tiger Proofing (see p. 9).

DREAM 18 PRESTIGE LEVEL

Build your course hole by hole, steadily increasing the overall prestige of the course, which in turn attracts legends. Make it tough because the legends won't waste their time playing on an easy course.

DESIGN SECRETS

Opponents you defeat offer tips about what they look for in a course. Apply these secrets to your Dream 18 to increase the course's prestige, and the legends will come calling in no time.

CUSTOM

Set up a game exactly the way you want to for up to eight players. There are 14 types of games to choose from—each is described on-screen when selected. Certain game types allow Side Games: wagers on individual results within a round. There are also different Advanced settings available depending on the game type selected.

PRACTICE

You can develop your skills for free by practicing your long game, short game, specialty shots, and putting. To make the most of your competitive rounds, you should get familiar with your clubs through practice, lessons, and challenges from other golfers.

EA SPORTS™ GAME FACE II

The most complete player design system ever seen in a video game just got even better. From tattoos and piercings to the scar on your cheek, create anyone from age eight to eighty with this mind-blowing tool that lets you customize every detail of your character, while adorning him or her with the top clothing and gear available. Use cash to add more gear, clubs, and abilities to your personalized golfer. Use these tabs on the top of the Game Face II screen to bring your golfer to life:

Vitals	Choose your swing type, handedness, and difficulty level.
Equipment	Equip your golfer with the top gear available from some of the biggest names in the industry.
Clothing	Get a new look for yourself with shirts, pants, headwear, shoes, and other apparel.
Attributes	Purchasing attributes is the only way to hang with the Pros.
Head/Face/Body	Infinitely adjust every aspect of your golfer's appearance from head to toe.
Accessories	Keep the sun out of your eyes or buy a watch so you'll never be late for a tee-time again.
Tattoos	Select tattoos that you can put on your golfer or logos for his clothing.

PLAY ONLINE

LAN PLAY

Set up or join a LAN game and invite your friends.

- ❖ To begin a network game, click PLAY ONLINE in the Main menu, and then select LAN.

OPTIONS

Configure a wide variety of audio, video, gameplay, and course options to optimize performance on your computer. For a description of the effect of each option, highlight it with your mouse and read the on-screen text.

PERFORMANCE TIPS

SYSTEM REQUIREMENTS

It is essential that your Macintosh meets the Minimum Requirements as detailed on the game's packaging. If you are experiencing poor performance, check to make sure your system hardware supports the requirements.

INTERNET PERFORMANCE ISSUES

To avoid poor performance during Internet play, be sure that you close any file sharing, streaming audio, or chat programs prior to entering gameplay. These applications can monopolize your connection's bandwidth, causing lag or other undesirable effects.

Please consult your router or personal firewall documentation for information on how to allow game related traffic. If you are attempting to play on a corporate Internet connection, contact your network administrator.

TECHNICAL SUPPORT

You should read through the manual and the Readme file on the CD before contacting Aspyr. Please ensure that your computer meets the minimum system requirements that are listed on the bottom of the box. Our Technical Support representatives will not be able to help customers whose computers do not meet these requirements. So that we can better help you, please have the following information ready:

- Complete product title
- Exact error message reported (if any)
- A brief description of the problem
- Your computer's processor type and speed (iMac 700 Mhz, PowerBook 1Ghz, etc.)
- Amount of RAM (MB, GB)
- Make and model of your video card (ATI, NVIDIA)
- Speed of your CD-ROM or DVD-ROM (16x, 4x)
- Operating System (10.2.8, 10.3.4)

NOTE

Please do not contact Technical Support for hints/codes/cheats: only technical issues.

CONTACT US OVER THE INTERNET:

If, after reviewing all the known issues in this Read Me file, you are still having difficulties, please visit our online technical support page at www.aspyr.com/support. If your problem is not currently listed, then please gather all information regarding the problem, including attempts to resolve the problem, error messages, and computer specifications and fill out the detailed support form located at www.aspyr.com/contact. This form will then be sent to Aspyr Media Technical Support.

CONTACT US BY PHONE:

You can also contact us by phone by calling (512) 708-8100. Note that this number is for technical assistance only. No hints and tips will be given out over the Technical Support line. When calling our Technical Support line, please make sure you are in front of your computer and prepared to provide all necessary information about your computer.
