

# The TREASURE HUNT

PC • CD-ROM FOR  
AGE  
4-9  
YEARS  
& MAC

# Machine Specifications

## IBM and PC compatible

### Low specification:

386/33 MHz or 486/25MHz with 4 MB of RAM. Treasure Hunt prefers 8 MB RAM. 256 colours at 640x480 pixels.

### High Specification:

486/50 MHz or greater with 8 MB of RAM

### Either require the following:

Double speed CD-ROM drive (300Kbs/second) or better. Soundblaster compatible sound card. Windows 3.1

## Macintosh

### Low specification:

LC III or better with 4 MB of RAM. Treasure Hunt prefers 8 MB RAM. 256 colours at 640x480 pixels.

### High Specification:

Centris 650/Quadra/Performa 630/Power PC with 8 MB of RAM

### Either require the following:

Double speed CD-ROM drive (300Kbs/second) or better.

**Important – for best results on a PC.** PC users shouldn't forget that you can load The Treasure Hunt using the "Easyload System" making repeated use of the program simple. Because of the large sequences of animation The Treasure Hunt runs best with VESA/PCI or similar style bus.

A double speed drive preferable.

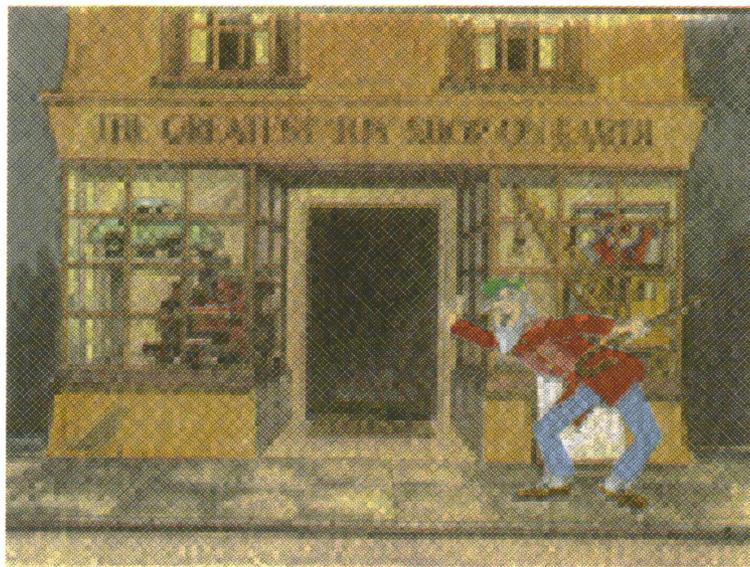

*See User Guide for further details*

**“I want a Toy Shop of my own.”**

*Well now you can have one and it will come to life in your own home,  
on your computer screen.*
